> As we suspected the terrible mutiny on board the American ship Frank N. Thoyer has turned out to be the result of gross ill treatment of the crew. A telegran dated Boston, April 10th. says:-- The muting which resulted in the burning of the Boston hip Frank N. Thayer in the South Atlantic Oman in January, will be recalled as one of the bloodiest tragedies of recent Robert Sanborn of Sweden, Louis Anson, H. Wilson, and C. Hendrickson of Norway. They state that Captain Clarke and Mate Holmes were very abusive, and that was the undoubted cause of the mutiny. It was a common thing to hear the noise of beating and clubbing of sailors in the night, and this scoounts for no notice being taken of the muticy in which two men only were concerned until the had secured possession of the ship, which they held for more than twentyfour hours. The two Manila men who committed the murders were frequently beaten, and it was the outrageous tymnny inflicted on them which led to the mutiny. The men gave detailed accounts of their brotal treatment and also a story of the mutiny similar to that which has already been printed.

The Tories are exulting over the aggressiveness of their fighting men and the weakness and dissensions of the Liberals. The criticism of the weekly press develops nothing worthy of note. The main point of attack, not only by the weeklies, but in the clubs and elsewhere, is the provision for the exclusion of the Irish memhers from the Imperial Parliament at Westminster, the indefiniteness of the finance and customs clauses and the vague character of easy to magnify these objections to Gladstone's Chinese. proposals beyond their true value. For my part, unable to form a stable ministry. A Salisbury labour nor American civilization. Government is the only alternative. Such a ministry would probably have to face an early defeat and appeal to the country for a big majority on the Irish ory. NEW YORK, 12th April. The Post's London special says: - 1 sensation has been orused by the sudden right-about-face of the Daily News, the Ministerial organ, and the only London journal supporting Gladstone's Home rule scheme. This is what the New's aditorial says this morning :- "The state of Ireland during the past ten years, the brutal murders, the houghing of cattle, cowardly boycotting and the general state of terrorism in which society has lived, owing to the machinations of socret assassins, have aroused a feeling of deep indignation and disgust in English minds. Beyond this, is the conduct of the Irish members of the House of Commons. A nation that has seen the traditions of its historical Parliament traduced, its authority defied, and the House of Commons turned into a bear garden in the name of Home Rule, can scarcely be expected enthusiastically to espouse a cause so tainted. We are constrained to admit our conviction that the country is not yet ripe for Home Rule in Ireland. We regard Gladatone's scheme as one of the most consummate pieces of constructive statesmanship presented by even the author of the series of Irish Land Acts which have delivered Ireland from the members of an alien church, but we do not conceal our belief! that though the measure may pass its first or second reading, it cannot, unless a remarkable change takes place in public opinion, become a law at this session "

It will be remembered, says a contemporary,

with Russia last April, general approval was ex-

pressed of the energetic measures adopted by

Lord Dufferin in anticipation of the outbreak of

hostilities. The highest military authorities,

that the armed strength of India was not equal

to the strain that was likely to be put upon it;

and in addition to lavish expenditure on imme-

diate preparations for placing a force in the field

and strengthening the frontier, it was resolved

to increase permanently the garrison of India.

Lord Dufferin, as we have said, was applieded at

Russian scare passed away and the inevitable

reaction set in. It has been emphasized since

the issue of the Budget, in which the increased

outlay under the head of military expenditure

has been made apparent, and there is now a ten-

the firm attitude which he assumed last spring.

In these days of enterprise and innovation it

does not do to be surprised atanything new;

to have the recommendation of great rapidity of

action, and freedom from many of the objections

to cremation in the ordinary way, and admits of

several little improvements upon all recognised

forms of burial; it might be so arranged that

the next of kin or the chief mourner should

with his own hand press the knob sending

the current through the body, and thus have the

melancholy satisfaction of performing the last

sad rites. We do not know the inventor's name.

There is good deal in a name after all.
